Chapter 1 Overview

1.overview

HD Show is a synchronous broadcast control software with rich functions, easy to learn and easy to use, and users can enjoy the current popular and high-quality playback control platform.

HD Show supports video, image, text, clock and other general functions, as well as streaming media, website, screen capture function.

2.Software operating environment

The computer configuration will affect the playback effect. Users can adjust the computer configuration according to the complexity of the program and whether the video is a highdefinition video source.

The recommended configuration is as follows:

Operating system: Windows 7/10 64-bit operating system

CPU: Core i5 or higher

Memory: 4G or more

o o. Independent graphics card: GTX950 or higher

Chapter 2 Software Installation and Uninstallation

1.software Installation

Double-click the .exe file of HD Show and follow the software installation wizard Installation operation.

1) Select language and click "OK".

Next >

Cancel

It is recommended that you close all other applications before starting Setup. This will make it possible to update relevant system files without having to reboot your computer. Click Next to continue.

3) Select the installation location and click "Install".
