

i5

Receiving Card

Specification

Overview

i5 is a high-end receiving card developed for fine-pitch LED screens featuring a large load capacity and up to 32 parallel data groups or 32 serial data groups. Due to its small form factor, i5 is best fit into concise cabinets. With DDR2 SODIMM interface, it can be effortlessly integrated into the HUBs and the display modules, allows for flexible screen design.

i5 not only has all the functions of mainstream receiving cards, but also a series of practical and powerful features helping high-end displays to maximize video performance with stunning clarity.

Features

Display effect

- 8bit video source input.
- Color temperature adjustment.
- 240Hz frame rate.
- Better gray at low brightness.

Correction processing

- High precise per-pixel calibration in brightness and chromaticity.

Easy maintenance

- Highlight and OSD.
- Screen rotation.
- Data group offset.
- Quick firmware upgrade and quick release of correction coefficients.

Stable and reliable

- Loop redundancy.
- Ethernet cable status monitoring.
- Firmware program redundancy and readback.
- 7×24h uninterrupted work.

Feature details

Display effect	
8bit	8bit color depth video source input and output, monochrome grayscale is 256, can be matched with 16777216 kinds of mixed colors.
Frame rate	Adaptive frame rate technology, not only supports 23.98/24/29.97/30/50/59.94/60Hz regular and non-integer frame rates, but also outputs and displays 120/240Hz high frame rate pictures, which greatly improves picture fluency and reduces drag film. (Note: it will affect the load).
Color temperature adjustment	Adjustment of color temperature, that is, saturation adjustment, to enhance the expressiveness of the picture.
Better gray at low brightness	By optimizing the gamma meter algorithm, the display screen can maintain the integrity and perfect display of gray scale when reducing the brightness, showing the display effect of low brightness and high gray scale.
8bit calibration	8bit precision brightness and chromaticity correction point by point, which can effectively eliminate the chromatic aberration of the lamp point, ensure the uniformity and consistency of the color brightness of the entire screen, and improve the overall display effect.
Shortcut operation	
Cabinet highlight	Using the control software, you can quickly mark the selected target cabinet, display a flashing box on the front of the cabinet, and change the flashing frequency of the cabinet indicator at the same time, which is convenient for front and rear maintenance.
Quick OSD	Using the control software, you can quickly mark the actual hardware connection serial number of the receiving card corresponding to the Ethernet port, which is convenient for setting the connection relationship of the screen.
Image rotation	Single cabinet image to be rotated at 90°/180°/270° angles, and with part of the main control, the single cabinet image can be rotated and displayed at any angle.
Hardware monitoring	
Bit error detection	It supports the detection of data transmission quality and error code between receiving cards, and can easily and quickly identify the cabinet with abnormal hardware connection, which is convenient for maintenance.
Redundancy	
Loop redundancy	The redundant Ethernet port is used to increase the connection with the transmitting equipment and increase the reliability of cascading between equipment. When one circuit fails, it can realize seamless switching to the other circuit and ensure the normal display of the screen.
Firmware redundancy	It supports firmware program backup and can be upgraded safely. There is no need to worry about the loss of firmware program due to cable disconnection or power interruption during the upgrade process.

Basic parameters

Control System Parameters	
Control Area	PWM chips: 512×384 pixels. Normal chips:512×256 pixels. Shixin: 512×324 pixels.
Ethernet Port Exchange	Supported, arbitrary use
Grayscale	Up to 65536 grayscale.
Display Module Compatibility	
Supported Chips	PWM chips, normal chips, Shixin chips
Scan Type	Up to 1/128 scan
Module Dimension	Up to 8192 pixels per data group.
Cable Direction	Route from left to right, from right to left, from top to bottom, from bottom to top.
Data Group	32 groups of parallel RGB data and 32 groups of serial RGB data, the later can be extended to 128 groups. Data groups can be exchanged freely.
Data Folded	<ul style="list-style-type: none"> • Normal chips: 2~8 fold horizontally, 2~4 fold vertically. • PWM and Shixin chips: horizontal or vertical 2~8 fold.
Module pumping point, row and column	Any pumping point and any pumping row and any pumping column
Monitoring Function (work with the module with corresponding sensor)	
Bit Error Monitoring	Monitor the total number of data packets and error packets to check network quality
Pixel-to-Pixel Calibration	
Brightness Calibration	8bit
Chromaticity Calibration	8bit
Other features	
Redundancy	Loop redundancy and firmware redundancy.
Optional functions	Shaped screen, etc.

Hardware

Appearance

Interface

S/N	Name	Function	
1	Signal indicator	Flashes once per second	Receiving card: normal. Ethernet cable connection: normal.
		Flashes 10 times per second	Receiving card: normal. Cabinet: Highlight.
		Flashes 4 times per second	Receiving card: working with back up channel (Loop redundancy status).
2	Power indicator	Red indicator always on: the power supply is normal.	
3	Gold finger interface	Used to connect with the HUB or unit board. From the diagram above, the left side of the guide plate is first pin (Viewing from the front of card)	

* i5 uses DDR2 SODIMM socket, please refer to the connector specification for details. The product photos in this article are for reference only.

Equipment Specifications

Physical Specifications	
Hardware interface	DDR2 SODIMM socket
Ethernet port transmission rate	1Gb/s
Communication Distance	Recommended: CAT5e cable ≤ 100m
Compatible with Transmission Equipment	Gigabit switch, Gigabit fiber converter, Gigabit fiber switch
Size ¹	L×W×H / 67.6mm (2.66") × 35.5mm (1.40") × 4.2mm (0.17")
Weight	9.5g / 0.02lbs, with heat sink.
Electrical specification	
Voltage	DC 3.8~5.5V, 0.5A
Rated power	2.5W
Body Static Resistance	2KV
Operating environment	
Temperature	-25°C~75°C (-13°F~167°F)
Humidity	0%RH-80%RH, no condensation
Storage and transport environment	
Temperature	-40°C~125°C (-40°F~257°F)
Humidity	0%RH-90%RH, no condensation
Packing information	
Packaging rules	Standard blister box device, 6 cards per box, 600 cards per carton
Package size	W×H×D / 550.0mm (21.65") × 180.0mm (7.09") × 398.0mm (15.67")
Certification	
* RoHS certification, EMC Class A certification, EMC needs to work with the cabinet design, please contact technical support for assistance.	

¹ Size and weight vary by manufacturing process.

Reference dimensions

Unit: mm

Tolerance: $\pm 0.3\text{mm}$

*Studs are not recommended for further fixing.

*If you need to use studs, please contact technical support.

Definition of Pins

32 groups of parallel data interfaces

Instructions	Definition	Pin No.		Definition	Instructions
Ground connection	GND	1	2	D5V	Power supply
